***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 10/05/2007 has been entered.

**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is that the prior art of record, including the JP 08165126 patent, fails to disclose or reasonably suggest having the combination of steps in a method for press-molding a glass optical element wherein a displacement is detected of a part of a structure member comprising a first die, and proceedingly calculating a correction value for a moving distance of a second die based upon the detected displacement of the structure member comprising the first die by a controller and then controlling the driving means so that the second die only moves relative to a correction a value corresponding to the detected displacement from above.

The prior art furthermore fails to suggest detecting the temperature with a detecting means of the part of the structure member having a fixed first die, and proceedingly obtaining a correction value for a moving distance of the second die based on the data (ie detected temperature values and stored displacement values) that is stored in the memory of the controller for displacing the second die and, further, controlling the driving means to move the second die in accordance with the data.

2. It is considered that any reconstruction of the prior art would not be obvious to meet the distinguishable limitations of the instant application. Similar art is of record, however, does not precede the instant priority date.

### ***Conclusion***

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
